

## Introduction

My name is Daniel Eden, and I'm a designer. I've always been curious about the stories of objects; how they were made, and who made them. The process of Designing has a huge effect on our surroundings and our daily lives. More than anything, I like to design systems; frameworks and templates for content which are scalable, reliable, and reusable across mediums and environments.

In 2013, I graduated from Nottingham Trent University with a 1st class degree in Digital Media Technology BSc, and was awarded a prize for having the highest marks in my cluster. I was also a finalist for .net Magazine's "Brilliant Newcomer of The Year" award in 2013, and their "Young Designer of The Year" award in 2014.
